EZ Hand Hygiene System NO TOUCH DISPENSER

KUTOL
Hand Hygiene Specialists

No-Touch Solutions

In today's climate of heightened germ awareness, people often elbow-jab, kick and nudge their way around restrooms to avoid touching anything. It's more important now than ever to provide an accommodating, sanitary and hygienic restroom environment, and no-touch dispensers are a must-have component to accomplish this.

By reducing the surfaces one must touch in a public restroom, no-touch dispensers can help reduce cross-contamination and alleviate building occupant concerns. Restroom patrons prefer no-touch dispensers because they're sanitary, cleaning workers like them because they are easy to clean, and facility executives appreciate the cost savings they can provide. The EZ No Touch Dispenser is ideal for Class A office buildings, and any facility designed to leave visitors with a positive impression.

Visual Dispensing System VDS

When restroom visitors use Kutol's EZ Hand Hygiene No Touch Dispenser, they simply place their hand in front of the unit to receive a controlled portion of foam soap. Kutol's visual dispensing technology allows the users to see the single dose of foam as it dispenses. This unique design eliminates the waste that occurs when users are compelled to activate the sensor a second time, using twice as much foam soap. Kutol's Visual

Dispensing System is more cost-effective, uses less foam and improves the image of all restrooms.

Foam soap formulations on average require 20 percent less water and provide a better lather on their own, versus liquid soaps. There are six rich foam formulations available for use with the EZ No Touch Dispenser. (With VDS there is no product or water waste due to extra pushes.)

Kutol's EZ Hand Hygiene No Touch Dispenser Benefits

Cost Effective

- Foam soap provides two times more hand washing than liquid bag-in-box systems
- Reduced soap and water use eliminates waste

Hygiene

- Reduced opportunity for restroom cross-contamination
- Easier and more effective for washing hands, increasing the likelihood of hand washing

Sustainable Hygiene

- Foam uses 20% less water than liquid
- Foam uses 50% less soap than liquid
- Kutol's bag-only refill reduces packaging waste by 50%
- Visual Dispensing System uses 20% less soap and water than blind bottom dispensing units
- Luxury Hand Soap is Green Seal GS-41 certified

Easy Maintenance

- Top-mounted valve eliminates leaks
- Easy vertical wall mounting system
- Large refill indicator window
- Six rich foam formulations available
- Modular battery pack can be changed without tools
- Dispenser and bag labels are color coded, multilingual directions
- Key locking mode is optional
- LED status indicator lights up when dispenser is activated and when batteries are low
